

Group Members: _____

PANEL RECOMMENDATION SHEET

Now you have read through the evidence and the pathway options. It's time to make a decision about how this region manages food production sustainability.

Step 1 – Weigh the pathways against the four lenses

As a panel, discuss each pathway using the evidence cards. You don't need a numerical score in the table below, a quick note (e.g. strong, weak, mixed or a short phrase) is enough.

Lens	Pathway A: Livestock	Pathway B: Plant-based	Pathway C: Technology
Health Does it help people eat well and stay healthy?			
Economy & Just Work Does it pay farmers and food workers fairly?			
Climate & Ecosystems Does it protect the climate, land and wildlife?			
Social & Cultural Values Does it respect how people and communities value food and farming?			

Step 2 – Your panel's recommendations

Which pathway does your panel recommend for the region: _____

Step 3 – Justify your decision

Write your panel's justification. Refer to at least two of the four lenses above and at least two evidence cards.

Step 4 – An objection (stretch)

If any panel member disagrees with the group's final recommendation, note their reasoning here. A good panel considers more than one perspective but still reaches a consensus.
